

Alcad Distribution amplifiers

Model : CF-711

Main features:

- Amplify VHF/UHF (47 ~ 862 MHz) input signal
- Reverse path 5 ~ 30 MHz, if required.
- Use as a distribution amplifier in multi-level projects.
- Maximum output 120 dB μ V.
- Separate gain adjustment and slope adjustment.
- Test points on input and output permits checking of levels of signal.
- Amplifier housing made from Zamak and galvanised plate for maximum shielding.

Output :	Return Path (5 ~ 30 MHz)	VHF/UHF (47 ~ 862 MHz)
Total Gain	16 dB	47 dB
Adjustable gain	0 dB	20 dB
